- Optimized back-end processes and database querys in mysql
- Learn and work with new technology like RestAPI , Django

Non Medical Auditor

Safecare Technology   2019 - 2024

PROJECTS

E-Commerce Website Using Django :-

This project deals with developing a Virtual website ' E-commerce Website ' . It provides the user with a list of the various products available for purchase in the store. For the convenience of online shopping, a shopping cart is provided to the user. After the selection of the goods, it is sent for the order confirmation process. The system is implemented using Python's web framework Django.

Child Vaccination Website System :-

Developed a web-based application using Django to manage vaccination schedules and records for children. The system allows child registration, tracks vaccination schedules and securely stores vaccination records. Integrated a user-friendly interface and database support for efficient data management.
